				<input type="checkbox"/> Fruits <input type="radio"/> Certified Organic <input type="checkbox"/> Vegetables <input type="radio"/> Certified Organic	<input type="checkbox"/> Accepts WIC/Senior Checks <input type="checkbox"/> Accepts Food Stamps	

Instructions to Auditor

For each of the following, please review each assessment section:

Grocery Stores:

To determine whether a store has sufficient variety, count the different types of fruits and vegetables available in the store. If a grocery store has 10 or more different fruits and vegetables, then document that the store has “variety”. If there are less than 10, document the total number of fruits and vegetables available. In addition, please attempt to answer the following for each audited grocery store:

1. Do they store have locally grown produce available in the store?
2. Does the store have pre-washed or pre-cut fruits and vegetables available?

Farmers’ Markets:

To determine the existence of a farmers’ market, the following criteria must be met:

- 3 or more growers comprise the market
- There is a set time for the sale of fruits and vegetables
- There is a set location for the sale of fruits and vegetables

Fruit and Vegetable Growers:

When determining a fruit and vegetable grower, attempt to answer the following:

Does the grower sell certified organic fruits and/or vegetables?

Does the grower sell to local grocery store(s)?

Convenience Store/Gas Station:

To determine whether the store has sufficient good variety, count the different types of fruits and vegetables available in the store.

In addition, please attempt to answer the following for each audited convenience store/gas station:

Does the store have pre-washed or pre-cut fruits and vegetables available?
